Attorney or Agent
for Applicant(s)**SECOND REQUEST FOR CORRECTED OFFICIAL FILING RECEIPT**COMMISSIONER FOR PATENTS
P.O. BOX 1450
ALEXANDRIA, VA 22313-1450

Applicant has received the official Corrected Filing Receipt for the application referenced above, a copy of which (with requested correction) is attached as Exhibit A.

The following errors appear on the Filing Receipt:

(1) Under the Section "Foreign Applications" the following priority information should be included:

"This application claims priority to GB 0323095.0 10/03/2003"

Applicant submits as Exhibit B the cover page of the prior international application, the

PATENT
Attorney Reference No. 739-73364-01

Preliminary Amendment and the Combined Declaration and Power of Attorney, all of which include the foreign priority claim.

Applicant requests that the above-identified errors be corrected and that a new official Filing Receipt be issued.

No fee should be required for this filing. The Director is hereby authorized to charge any fee that may be required in connection with this filing, or credit any overpayment, to Deposit Account No. 02-4550.

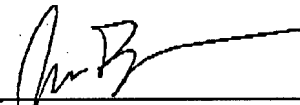

Please call the undersigned if any further information is required.

Respectfully submitted,

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process simplifies the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

(54) Title: SELF-LUBRICATING BEARINGS

(57) Abstract: A self-lubricating bearing for
use in low pressure, high frequency, small
amplitude applications and methods of operating
and constructing the same, the bearing having
a self-lubricating liner (3) and a counterface
surface (5) in close sliding contact therewith, the
counterface surface (5) having a surface finish
of less than 20nm and a hardness of less than in
the region of 1000VHN.

Amendments to the Claims

1. (Original) A self-lubricating bearing for use in low pressure, high frequency, small amplitude applications, the bearing having a self-lubricating liner and a counterface surface in close sliding contact therewith, the counterface surface having a surface finish of less than 20nm and a hardness of less than in the region of 1000VPN.
2. (Original) A self-lubricating bearing according to Claim 1, wherein the surface finish of the counterface surface is in the range of 5nm to 20nm.
3. (Currently Amended) A self-lubricating bearing according to Claim 1 ~~or 2~~, wherein the counterface surface comprises a coating on a curved surface, the curved surface having an electrolytically ground finish.
4. (Original) A self-lubricating bearing according to Claim 3, wherein the coating over the electrolytically ground finish has a thickness of between 1-5µm.
5. (Currently Amended) A self-lubricating bearing according to Claim 3 ~~or 4~~, wherein the coating is a chemical deposition coating, a physical vapour deposition coating or an ion plating coating.
6. (Currently Amended) A self-lubricating bearing according to ~~any preceding claim~~ Claim 1, wherein the bearing is a spherical bearing.
7. (Original) A self-lubricating bearing according to Claim 6, wherein the spherical bearing includes a ball, the ball providing the counterface surface.
8. (Currently Amended) A self-lubricating bearing according to ~~any preceding claim~~ Claim 1, wherein the operating conditions, in use, are at stresses of less than 35MPa, at a

Application Number PCT/GB2004/003908

frequency of at least 0.1 Hz and with amplitudes comprising small angular motions of less than $\pm 12^\circ$ rotation.

9. (Original) A method of constructing a self-lubricating bearing comprising the steps of:

providing a self-lubricating liner with a curved surface;
providing a counterface having a curved surface;
electrolytically grinding the curved surface of the counterface to a surface finish of less than 20nm to produce a counterface surface having a hardness of less than 1000VPN; and
placing the curved surfaces of the liner and the counterface surface in sliding contact with one another.

10. (Original) A method according to Claim 9, wherein the curved surfaces are correspondingly curved surfaces.

11. (Original) A method of operating a self-lubricating bearing having a self-lubricating liner and a counterface surface in close sliding contact therewith, the counterface surface having a surface finish of less than 20nm and a hardness of less than 1000VPN, wherein the operating conditions are at stresses of less than 35MPa, at a frequency of at least 0.1 Hz and with amplitudes comprising small angular motions of less than $\pm 12^\circ$ rotation.

12. (Canceled)

13. (New) A method according to Claim 9, wherein the bearing is a spherical bearing comprising a ball, and the counterface is a surface of the ball.

14. (New) A method according to Claim 9, further comprising forming a coating on the curved surface of the counterface, wherein the coating provides the counterface surface in sliding contact with the liner.

15. (New) A method according to Claim 14, wherein the coating is a chemical deposition coating, a physical vapour deposition coating or an ion plating coating.
16. (New) A method according to Claim 9, wherein the counterface surface has a hardness of less than 750VPN.
17. (New) A method according to Claim 14, wherein the coating has a thickness in the range of about 1-5µm.
18. (New) A method according to Claim 11, wherein the bearing is a spherical bearing comprising a ball, and the counterface surface is a surface of the ball.
19. (New) A method according to Claim 18, wherein the ball is a heat treated metal ball.
20. (New) A method according to Claim 19, wherein the ball has a physical vapour deposition coating providing the counterface surface in sliding contact with the liner.

Attorney Ref. No. 739-73364-01**COMBINED DECLARATION AND POWER OF ATTORNEY
FOR PATENT APPLICATION**

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention entitled SELF-LUBRICATING BEARINGS, the specification of which

- ☒ is attached hereto.
- ☐ was filed on _____ as United States Patent Application No. _____.
- ☒ was described and claimed in PCT International Application No. PCT/GB2004/003908, filed on September 13, 2004, and as amended under PCT Articles 19 on _____ (if applicable).
- ☐ and was amended on _____ (if applicable).
- ☐ with amendments through _____ (if applicable).

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 C.F.R. § 1.56. If this is a continuation-in-part application filed under the conditions specified in 35 U.S.C. § 120 which discloses claims and subject matter in addition to that disclosed in the prior copending application, I further acknowledge the duty to disclose material information as defined in 37 C.F.R. § 1.56 which occurred between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

I hereby claim foreign priority benefits under 35 U.S.C. § 119(a)-(d) of any foreign application(s) for patent or inventor's certificate or of any PCT international application(s) designating at least one country other than the United States of America listed below and have also identified below any foreign application(s) for patent or inventor's certificate or any PCT international application(s) designating at least one country other than the United States of America filed by me on the same subject matter having a filing date before that of the application(s) on which priority is claimed:
